An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 239, Nos. 1 & 2, October 2002

CELLULAR LIPID BINDING PROTEINS

Dr. Jan F.C. Glatz

Preface

J.F.C. Glatz, J.J.F.P. Luiken, M. van Bilsen and G.J. van der Vusse: Cellular lipid binding proteins as facilitators and regulators of lipid metabolism	I
G.J. van der Vusse, M. van Bilsen, J.F.C. Glatz, D.M. Hasselbaink and J.J.F.P. Luiken: Critical steps in cellular fatty acid uptake and utilization	3-7
J.A. Hamilton, W. Guo and F. Kamp: Mechanism of cellular uptake of long-chain fatty acids: Do we need cellular proteins?	9-15
J. Storch, J.H. Veerkamp and K.-T. Hsu: Similar mechanisms of fatty acid transfer from human and rodent fatty acid-binding proteins to membranes: Liver, intestine, heart muscle, and adipose tissue FABPs	17-23
R.A. Weisiger: Cytosolic fatty acid binding proteins catalyze two distinct steps in intracellular transport of their ligands	25-33
T. Hanhoff, C. Lücke and F. Spener: Insights into binding of fatty acids by fatty acid binding proteins	35-43
R.M. Hagan, J.K. Davies and D.C. Wilton: The effect of charge reversal mutations in the α -helical region of liver fatty acid binding protein on the binding of fatty-acyl CoAs, lysophospholipids and bile acids	45-54
M. Rademacher, A.W. Zimmerman, H. Rüterjans, J.H. Veerkamp and C. Lücke: Solution structure of fatty acid-binding protein from human brain	55-60
F.G. Schaap, G.J. van der Vusse and J.F.C. Glatz: Evolution of the family of intracellular lipid binding proteins in vertebrates	61-68
L.B. Agellon, M.J. Toth and A.B.R. Thomson: Intracellular lipid binding proteins of the small intestine	69-77
Y. Owada, I. Suzuki, T. Noda and H. Kondo: Analysis on the phenotype of E-FABP-gene knockout mice	79-82
E.J. Murphy: Sterol carrier protein-2: Not just for cholesterol any more	83-86
R.M. Fisher, A. Thörne, A. Hamsten and P. Arner: Fatty acid binding protein expression in different human adipose tissue depots in relation to rates of lipolysis and insulin concentration in obese individuals	87-93
D.M. Hasselbaink, T.H.M. Roemen and G.J. van der Vusse: Protein acylation in the cardiac muscle like cell line, H9c2	95-100
D.J. van der Horst, D. van Hoof, W.J.A. van Marrewijk and K.W. Rodenburg: Alternative lipid mobilization: The insect shuttle system	101-112
D.P.Y. Koonen, W.A. Coumans, Y. Arumugam, A. Bonen, J.F.C. Glatz and J.J.F.P. Luiken: Giant membrane vesicles as a model to study cellular substrate uptake dissected from metabolism	113-119
Marc van Bilsen, G.J. van der Vusse, A.J. Gilde, M. Lindhout and K.A.J.M. van der Lee: Peroxisome proliferator-activated receptors: Lipid binding proteins controlling gene expression	121-130
P. Besnard, I. Niot, H. Poirier, L. Clément and A. Bernard: New insights into the fatty acid-binding protein (FABP) family in the small intestine	131-138
J.-F. Landrier, J. Grober, I. Zaghini and P. Besnard: Regulation of the ileal bile acid-binding protein gene: An approach to determine its physiological function(s)	139-147
T. Helledie, C. Jorgensen, M. Antonius, A.-M. Krogsdam, I. Kratchmarova, K. Kristiansen and S. Mandrup: Role of adipocyte lipid-binding protein (ALBP) and acyl-CoA binding protein (ACBP) in PPAR-mediated transactivation	149-155
K. Fujishiro, Y. Fukui, O. Sato, K. Kawabe, K. Seto and K. Motojima: Analysis of tissue-specific and PPAR α -dependent induction of FABP gene expression in the mouse liver by an <i>in vivo</i> DNA electroporation method	157-164
Q. Wu, W. Chang, J. Rickers-Haunerland, T. Higo and N.H. Haunerland: Characterization of a new fatty acid response element that controls the expression of the locust muscle FABP gene	165-172
A. Bonen, J.J.F.P. Luiken and J.F.C. Glatz: Regulation of fatty acid transport and membrane transporters in health and disease	173-180
M. Febbraio, E. Guy, C. Coburn, F.F. Knapp Jr, A.L. Beets, N.A. Abumrad and R.L. Silverstein: The impact of overexpression and deficiency of fatty acid translocase (FAT)/CD36	181-192
J.R. Goudriaan, V.E.H. Dahlmans, M. Febbraio, B. Teusink, J.A. Romijn, L.M. Havekes and P.J. Voshol: Intestinal lipid absorption is not affected in CD36 deficient mice	193-197
H. Salah-Uddin, M.J. Gordon, I. Ford, N.N. Tandon, M. Greaves and A.K. Duttaroy: Surface expression of fatty acid translocase (FAT/CD36) on platelets in myeloproliferative disorders and non-insulin dependent diabetes mellitus: Effect on arachidonic acid uptake	199-202
S.L.M. Coort, J. Willems, W.A. Coumans, G.J. van der Vusse, A. Bonen, J.F.C. Glatz and J.J.F.P. Luiken: Sulfo-N-succinimidyl esters of long chain fatty acids specifically inhibit fatty acid translocase (FAT/CD36)-mediated cellular fatty acid uptake	203-211
F. Descalzi Cancedda, B. Dozin, B. Zerega, S. Cermelli, C. Gentili and R. Cancedda: Ex-FABP, extracellular fatty acid binding protein, is a stress lipocalin expressed during chicken embryo development	213-219
F. Guthmann, T. Borchers, C. Wolfrum, T. Wustrack, S. Bartholomäus and F. Spener: Plasma concentration of intestinal- and liver-FABP in neonates suffering from necrotizing enterocolitis and in healthy preterm neonates	221-225
Index to Volume 239	227-234
Instructions to Authors	235-237
	239-243
